Freelance Web Developer

miauwong.dev

Oct 2018 - present

- Designed and developed responsive websites that tailors to clients' needs. Includes e-commerce and business landing pages.
- Produce quality prototypes and update design based on client's feedback.
- Worked with content management systems like WordPress, Shopify (e-commerce) and Contentful (a headless CMS service) for clients.
- Launched projects by configuring DNS settings and servers with nginx or with services like Netlify and AWS.

Projects

cookin.io

- A MERN recipe app for users to explore, inspire, create and share recipes.
- A RESTful API built with Node.js/Express, store and retrieve data on MongoDB.
- Uses AWS Elastic Beanstalk for deployment, and AWS CodePipeline for CI/CD.
- Prototype built with Adobe XD, with user interface and user experience in mind.

React Weather App

- Uses DarkSky API to fetch and display data for current weather and 7 day forecast
- Uses Context API to easily pass data through the component tree
- Use of React Hooks to manages state and lifecycles for functional components
- Implemented auto-complete search bar with Google Auto-Complete API and Google Maps API.
- Fetches and displays an image that corresponds to users location from Unsplash
